

Cultivator: **Great Plains Simba SL 500**

This cultivator is available in 2 different colors

Standard Green

Orange

How do I change colors???

In the unzipped folder Great_Plains_Simba_SL_500 you will find the folder > textures <

within this folder you will find another folder named > alternative <

In the folder > textures < you will find the green textures

In the folder > alternative < you will find the orange textures.

First open the i3d file in notepad++ and search for the following entries:

```
8      <Files>
9          <File fileId="1" filename="textures/Diffuse_GP.dds" relativePath="true"/>
10         <File fileId="9" filename="textures/RadNormal.dds" relativePath="true"/>
11         <File fileId="8" filename="textures/Rad_texture_GP.dds" relativePath="true"/>
12         <File fileId="2" filename="textures/Specular_GP.dds" relativePath="true"/>
13         <File fileId="3" filename="textures/Streifen.dds" relativePath="true"/>
14         <File fileId="6" filename="textures/corona_orange.dds" relativePath="true"/>
15         <File fileId="4" filename="textures/corona_red.dds" relativePath="true"/>
16         <File fileId="5" filename="textures/emissiveBillboardShader.xml" relativePath="true"/>
17     </Files>
```

Then Change them into:

<Files>

<File fileId="1" filename="textures/alternative/Diffuse_**GP2**.dds" relativePath="true"/>

<File fileId="9" filename="textures/RadNormal.dds" relativePath="true"/>

<File fileId="8" filename="textures/ alternative/Rad_texture_**GP2**.dds" relativePath="true"/>

<File fileId="2" filename="textures/ alternative/Specular_**GP2**.dds" relativePath="true"/>

<File fileId="3" filename="textures/Streifen.dds" relativePath="true"/>

<File fileId="6" filename="textures/corona_orange.dds" relativePath="true"/>

<File fileId="4" filename="textures/corona_red.dds" relativePath="true"/>

<File fileId="5" filename="textures/emissiveBillboardShader.xml" relativePath="true"/>

</Files>

Now you only have to replace the modDesc with the one you will find in the folder > textures > alternativ repack it to Great_Plains_Simba_SL_500 and the cultivator has changed color ingame.

Have much fun with this new bonus content.
